LONGCHAMP GALILEO EQUITY INCOME FUND

(Sub-Fund of the UCITS Fund « LONGCHAMP INVEST »)
Share Class B (ISIN FR0013187945)
Manager : Longchamp Asset Management

OBJECTIVES AND INVESTMENT POLICY

The Sub-Fund Longchamp Galileo Equity Income Fund (« the Sub-Fund) is a UCITS Fund categorized as « diversified ».

The objective of the Sub-Fund is to seek to deliver an annualized performance net of fees higher than that of its benchmark, EONIA capitalized +1% over the recommended investment period of 5 years minimum. EONIA is the benchmark for the Eurozone money market.

To achieve its objectives, the Sub-Fund will, on a discretionary basis, take long and short positions in put options using major equity market indices as underlying assets.

The indices selected as underlying assets will be those of equity markets of developed countries, which, according to the Investment Management Company, benefit from significant liquidity (North America, Europe and Asia) and possess an active option market. Underlying assets and options selection process will be based on instruments' price levels (depending on implicit volatility more specifically) and on trading signals. The Sub-Fund will buy put options which strike price is deeper out of the money than that of the put options sold. Nevertheless, the notional invested in long positions (long put) will be higher than the notional invested in short positions (short put). The goal is to benefit from a premium expected to be attractive while maintaining a potential hedge against global market rout.

Net exposure of the Sub-Fund to equity indices is expected to remain between 0% and 20%.

For cash management purposes, the Sub-Fund may invest its cash (which may represent up to 100% of its net asset) in money market and bonds instruments issued by OECD countries as well as Hong-Kong and Singapore, which the Investment Management Company will consider having a minimum rating of BBB-The Sub-Fund may hold up to 10% in money market UCITS funds. The Investment Management Company has developed proprietary credit risk evaluation tools to select and evaluate securities as well as their respective quality and does not exclusively and automatically rely on ratings as provided by major credit rating agencies The Sub-Fund's modified duration will range between 0 and 10.

The Sub-Fund may implement efficient portfolio management techniques and may thus use securities lending and repurchase agreements and/or collateralized asset swaps for up to 100% of its net assets. The Sub-Fund will use derivate instruments, whether listed or over-the-counter, in order to implement its investment strategy.

The portfolio will be managed such as its global exposure will not exceed a Value at Risk higher than 3% of the Sub-Fund's net assets (based on a confidence level of 99% and a holding period of 1 day). The Sub-Fund's maximum exposure to currency risk (resulting from investing in options, fixed income instruments and money market instruments denominated in other currencies than the Sub-Fund's base currency) is limited to one time the Sub-Fund's net assets.

Allocation of income: Accumulation

Recommended investment period: More than 5 years.

The Sub-Fund may not be appropriate for investors who plan to withdraw prior to the recommended investment period.

Subscription and redemption terms:

RISK – REWARD PROFILE

MEANING OF THIS INDICATOR: This indicator measures the level of volatility and risk of the Sub-Fund. The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the Sub-Fund's future risk profile. The risk category shown is not guaranteed and may change over time. Note that a high potential gain also carries a high risk of loss. This Sub-Fund is classified as '4' given its exposure to market risks and the estimates of its volatility level which may range between 5% and 10%. Funds classified as '1' mean that one's capital is exposed to low risk but that potential gains are also limited. However, such funds classified as '1' should not be

seen as a risk-free investment.

KEY RISKS NOT TAKEN INTO ACCOUNT IN THIS INDICATOR:

Counterparty risk: Default risk linked to a counterparty which would lead to a decline in the Sub-Fund's net asset value.

Risk related to the use of derivative transactions: To achieve its investment objective, the Sub-Fund will use derivative instruments which may be impacted by several types of risks (liquidity and volatility more specifically). The occurrence of these risks may result in an increase of the Sub-Fund volatility and a decrease in its net asset value.
