

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

MS Ascend UCITS Fund Share Class I USD (ISIN: IE00B4XD6J42)

The MS Ascend UCITS Fund ("Fund") is a sub-fund of FundLogic Alternatives Plc ("Company").

OBJECTIVES AND INVESTMENT POLICY

- The Fund's objective is to generate returns linked to the performance of a portfolio (the "Reference Portfolio"), which aims to generate positive returns regardless of market direction, by buying and selling mainly shares of U.S. companies
- The investment process involves buying undervalued and selling overvalued financial instruments
- The Reference Portfolio invests in publicly-traded shares, financial instruments with characteristics similar to shares, exchange-traded funds and foreign exchange either directly or indirectly through financial contracts known as derivatives
- The Reference Portfolio may not always maintain a balance between financial instruments bought and sold, thus performance could reflect the performance of the market
- The Fund may invest in a wide range of instruments including shares, fixed income instruments (corporate and government bonds, which may be above or below investment grade) and investment funds (collectively, the "Funding Assets"). Thereafter, the Fund will enter into a derivative contract with a counterparty whereby the Fund will transfer the value of the Funding Assets to the counterparty in return for the performance of the Reference Portfolio
- The Fund may be leveraged up to 300% of its net asset value, although on average it is expected to be leveraged from 150% to 180% of its net asset value. Leverage is calculated using the full notional amount of each financial derivative instrument
- Costs incurred in the use of derivatives may have a negative effect on the Fund's performance
- Additionally, the costs of buying and selling investments are paid out of the Fund's assets and may have a negative impact on the Fund's performance. These costs are in addition to those listed in 'Charges' below
- The investment manager monitors the Fund daily and has discretion to change the asset allocation
- Any income from the Fund will be re-invested and the Fund will not pay out any dividends
- The value of the Fund is calculated and published daily except as set out in the Company's prospectus and the sub-fund's supplement (collectively "Prospectus"). Investors can buy and/or sell back their shares every Friday

RISK AND REWARD PROFILE

- The Fund is assigned to this category because its share price is expected to fluctuate slightly due to the investment policy applied

You should be aware that:

- Past performance and/or simulated data may not be a reliable indicator of the Fund's future performance
- The lowest risk category does not indicate a risk free investment
- The risk and reward category shown above is not guaranteed and may move down or up over time
- The Fund is neither capital guaranteed nor protected
- There is no assurance that the Fund will achieve its investment objective and you may lose money. The Fund's performance will be affected by market movements

Other risks that you should be aware of, which may not be captured by the Risk and Reward Indicator, include:

- The Reference Portfolio may invest in shares of small to medium companies. These may be less liquid, have narrower market penetrations, less diverse product lines and fewer resources than larger companies, which may make their prices more volatile
- The investment manager may invest in shares of companies shortly after its initial public offerings. There may be special risks associated with these securities including limited availability of shares, unseasoned trading and limited operating history
- The Fund may use certain investment strategies that could result in the Fund losing money in a rising market
- The entity with whom the Fund enters into derivative contracts may become unable to meet their financial obligations under the contract
- The use of derivatives involves a higher level of complexity than a direct investment and may multiply the gains or losses by the Fund on a given investment or its investments generally
- Investment in the Fund may be affected by operational risks at the investment manager, the administrator and other service providers to the Fund. The investment manager manages the Fund and so the success of the Fund depends, among other things, upon the ability of the investment manager to manage the asset allocation of the Fund
- As the Reference Portfolio's assets may be valued in currencies other than the Fund's base currency, its performance may be down or up due to changes in foreign exchange rates
- In certain instances, the directors of the Fund may temporarily suspend trading in Fund shares and this may affect your ability to buy or sell shares

CHARGES

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment

One-off charges taken before or after you invest	
Entry charge	Not Applicable
Exit charge	Not Applicable
<i>This is the maximum that might be taken out of your money before it is invested / before the proceeds of your investment are paid out.</i>	
Charges taken from the fund over a year	
Ongoing charges	1.89%
Charges taken from the fund under certain specific conditions	
Performance fee 20.00% a year of any returns the Fund achieves above the highest previous level achieved, adjusted to reflect the number of shares bought and sold during that calendar year Performance fees charged in the Fund's last financial year were 1.06% of net asset value	

- The entry and exit charges shown are maximum figures. In some cases, you may pay less or there may be no charge. You can find out the actual entry and exit charges from your financial adviser or distributor
- In exceptional cases, the Fund may impose a fee when buying back large quantities of shares from investors. This will be the case where large share buy backs negatively move the markets, thereby reducing the value of the portfolio for other investors
- The ongoing charges figure is based on the expenses for the year ending 31 July 2015. This figure may vary from year to year
- These charges exclude (i) the costs of buying or selling assets, except in the case of an entry/exit charge paid by the Fund when buying or selling shares in another fund and (ii) performance fees

For more information about charges, please refer to the "Charges and Expenses" section of the Fund's supplement, which is available at www.fundlogic.com

PAST PERFORMANCE

- Past performance is not a reliable indicator of future performance
- The performance shown takes into account all charges and costs
- The fund and this share class were launched in 2011. The share class has been fully redeemed in 2013, and re-launched in 2014
- The past performance has been calculated in USD

PRACTICAL INFORMATION

- Depository: Northern Trust Fiduciary Services (Ireland) Limited
- Further information about the Fund, including the Prospectus, latest annual and half yearly reports and latest published share prices, can be obtained, free of charge, from Northern Trust International Fund Administration Services (Ireland) Limited, George's Court, 54-62 Townsend Street, Dublin 2, Ireland and at www.fundlogic.com.
