INVESTMENT MANAGER'S REPORT as at 31 January 2012
MS PSAM Global Event UCITS Fund

The objective of the MS PSAM Global Event UCITS Fund (the "Fund") is to provide shareholders with a return linked to the performance of the PSAM Investment Strategy.

The PSAM Investment Strategy seeks to achieve superior risk adjusted returns associated with exposure to the equity, debt and other securities of companies which, in the opinion of the Investment Advisor ("PSAM"), are mispriced relative to their inherent or embedded value. PSAM further believes that the mispricings are generally attributable to a corporate action or corporate events. PSAM's event driven approach focuses on three main strategies; Merger Arbitrage, Distressed and Stressed Credit Opportunities and Special Situations. Weightings and allocations among the three strategies are opportunistic and vary depending on where the best risk-reward can be found at any given time.

The European sovereign and financial crisis remains at the forefront of investor concerns and helped continue to drive risk reduction over the period. The inability of U.S. politicians to reach a compromise and develop a credible plan to reduce the U.S. deficit resulted in S&P downgrading the U.S. debt in August, and contributed to further volatility.

We aggressively repositioned exposure levels in August, as volatility contributed to significant spread widening across most M&A situations, creating exciting return oriented opportunities. We were opportunistic, and overweighted short duration, hard contract deals, while reducing softer catalyst situations.

As the period progressed, deteriorating financing conditions, increased funding costs, widening sovereign spreads and regulatory enforcement contributed to the demise of Belgian-French bank Dexia and MF Global. Regulatory and market forces are pushing banks to delever and restructure debt, particularly in Europe. We believe the latest Long Term Refinancing Operation ("LTRO"), by the European Central Bank, has reduced the systemic risk element for the near-term. Although progress is being made, a much more comprehensive solution will be required to resolve the European problems. European banks, which are facing a June 30 deadline to improve their liquidity positions, should create significant opportunities through liability management exercises, recapitalizations and asset sales.

The pace of M&A activity slowed during the fourth quarter due to ongoing European credit concerns and further uncertainty regarding global economic growth. Despite the drop off in activity during the fourth quarter, global M&A volumes still finished 2011 up 4% from the prior year.¹ The industrial and energy sectors were the most active for deal making in 2011. The largest deal of the year was announced in October, as Kinder Morgan agreed to buy the El Paso Corporation for about \$21.1 billion in cash and stock, striking one of the biggest energy deals in history.

Our focus on hard events and disciplined hedging program helped us navigate a volatile 2011 and finish the year in positive territory. For the six month period ended January 31, 2012 the Fund's Class B EUR shares returned 2.67%. At the end of January, the PSAM Investment Strategy was 64% invested in merger arbitrage, 19% in credit opportunities and 17% in special situations.

As we look ahead, we are mindful that there are a number of unresolved geopolitical and structural issues abroad creating an investment environment that is less predictable than usual. Nevertheless, we are witnessing a resurgence of opportunities in all three of our sub strategies.

¹ Citi M&A Summary (December 2011).

INVESTMENT MANAGER'S REPORT as at 31 January 2012
Salar Convertible Absolute Return Fund

The latter part of 2011 proved a frustrating time for most strategies and convertibles were no exception. The lack of confidence in the macro environment, exacerbated by the ongoing eurozone debt problems, made whipsawing equity markets, widening credit spreads and falling convertible valuations hallmarks of the period. A strong equity market rally at the beginning of 2012 gained the MSCI World Index 5.7% but it still ended the 6 month period to Jan 31st down almost 6%. The Salar Convertible Absolute Return Fund struggled in these conditions to make consistently positive returns but protected capital well to finish -1% over the same time-frame for the Fund's class B USD.

The period began in August with carnage in financial markets as equity and credit markets retreated sharply on the downgrading of US Government debt and the deepening crisis in Europe. The Fund, benefitting from gains in its puts, demonstrated its absolute return credentials and ended the month with a small profit. The equity and credit rout continued into September, and convertibles cheapened further. The defensive nature of the short-dated calls in the portfolio mitigated the losses but they still outweighed the profit from the puts and the Fund posted a loss on the month. Nevertheless our focus on bonds with low premiums to both the bond floor (call trades) and to parity (put trades) offered some protection and we avoided the greater losses that caused such pain elsewhere. The strong downward momentum and troubled economic conditions in the eurozone saw us entering October with a 25% net short equity position, our largest to date, only for equity markets to stage their biggest one month rally since 1974. While clearly positioned incorrectly for this extreme directional move the fund still posted a small profit. The defensive calls quickly gained value, demonstrating the power of convexity and the "gamma" embedded in the portfolio. While a volatile November ended with equity markets largely flat, credit markets were far more pessimistic and convertible valuations further cheapened. Again, it was our defensive stance of focussing on short-dated convertibles in the call bucket that saw the fund outperforming many of its peers. The year ended with a frustrating month, in part because a number of bonds in the portfolio reached maturity without the underlying equities exhibiting the moves required to make them work. Into 2012 and it was a far more optimistic picture. As equity markets rallied, convertible valuations saw some improvement and the welcome return of dispersion to markets, previously lacking in this turbulent period, saw the fund gain 1.9% in January.

The building blocks of the strategy offer an attractive asymmetric risk profile - limited downside but also the ability to capture the upside when markets gain, or profit when they fall, allowing the investor exposure to equity markets without having to call the low. The financial dislocation has also created a significant opportunity in convertibles which have cheapened significantly and now offer high yields (greater in many cases than comparable straight bonds) and cheap options, previously a precursor to high returns from the asset class. Furthermore, one of the lessons of this period has been to trade the gamma in the fund more, rehedging the delta more aggressively in volatile times. With the global economy continuing to face significant challenges we expect numerous opportunities to capture these moves. The Fund has demonstrated it can protect capital in difficult times and we remain confident that we can meet our return target over time without adding either to the risk or to the volatility of return.

**INVESTMENT MANAGER'S REPORT as at 31 January 2012
INDUS SELECT ASIA PACIFIC FUND**

The Indus Select Fund had a negative return of 9.44% (net of fees and expenses) in the six month period to 31 January 2012. By comparison MSCI AC TR Net Asia Pacific Index fell 9.04% in USD terms and -7.7% in local currency terms. For the year ending 31 January 2012, the fund was down -6.11% against a decline of 7.63% for the index.

The half-yearly period began with Asian equities suffering alongside global equities from adverse developments in Europe, the US and China. European leaders remained on their back foot with regard to the sovereign debt crisis unfolding there, the US government lost its S&P AAA rating, and fears grew of a hard landing in China. At the worst point, share prices worldwide ended September 19% lower on average. Markets in the region that fared comparatively well during the Fall sell-off were Japan, New Zealand and the Philippines, while the worst were China, Korea and Hong Kong. In terms of attribution for the Indus Select Fund, stock selection was additive into the September market lows, led by positive contributions in Japan, Taiwan and Hong Kong/China. By sector, stock selection was beneficial in consumer staples, IT, financials and telecommunications. Positions of the fund that were helpful in this regard include Japan Tobacco, TSMC, Credit Saison and China Mobile. From the perspective of allocation, the fund benefited from an average cash position of 4%, an underweight in Korea, Taiwan and Australia and an underweight in materials and energy. The second half of the period which began with the global market lows in early October and ended with the rally in January saw a reversal of country returns with Japan lagging and strength in Hong Kong. In terms of attribution in this latter period, the fund benefited from strong stock selection in Japan and Taiwan but stock selection in Australia and India was poor.

In terms of changes to individual positions, early in the period the Manager exited IGB of Malaysia at a modest gain, as well as Indofood CBP in Indonesia on concern that competition in instant noodles was intensifying at a rate that exceeded our original expectations. A more compelling, liquid opportunity presented itself in Ctrip, China's leading consolidator of hotel and airline bookings, which the fund purchased early in the Fall.

More importantly, the Manager established a position in Olympus in early November after its market capitalization had declined by over 75% from early 2011. At that point, the market capitalization had plunged from over US\$8bn at the beginning of 2011 to only US\$1.7bn. Since the company is levered, enterprise value was significantly greater – we estimated it was about US\$7bn at the share price low – but nevertheless low enough to imply a modest valuation for the core business of Olympus of interest to us, medical systems (endoscopes and related surgical devices). This division has a leading position globally, generates annual sales exceeding US\$4bn, and has normalized earnings of about US\$850m. The other divisions of Olympus – including its well-known imaging systems division (cameras) – in aggregate tend to generate losses of a few hundred million US dollars per year on sales of US\$6bn or so. Of course, our decision to buy Olympus shares also compelled us to take a view as to whether the company would be able to maintain its full status as a listed company following the well-known accounting scandal and multi-year cover up. We took this risk on the view that the power that be in Japan would engineer an outcome that protected the status of Olympus as a listed entity, and prevented it from falling into the hands of a global competitor. So far this has proven to be the case, and the fund's position in Olympus – in less than three short months – was the largest contributor to the fund's performance for the period.

Looking forward to 2012, our view is that the Chinese economy is slowing faster than the headline figures suggest. On the face of it we are "overweight" Hong Kong and China, but several of our positions that are categorized as such in fact have large regional footprints outside greater China (e.g. AIA, HSBC).

Japan enters 2012 with its equity market still hovering around December 1983 levels, a period of more than 28 years, in aggregate, of average stock prices going nowhere. After a year when everything that could go wrong in Japan did, prospects for Japan appear to be improving. As ever, we consider it best to look at Japan as a "market of stocks" rather than a stock market. It remains a cheap, broad and liquid market in the context of the region, where stockpicking can generate consistent alpha and we are overweight several names at record-low valuations with strong earnings prospects in FY3/13. Overall, our pan-Asia view is that valuation multiples are still generally attractive across the region and we are optimistic about the prospects for another year of relative outperformance and, more importantly, the scope for positive returns in absolute terms.

The above represents the largest 20 purchases and sales in the period.

INVESTMENT MANAGER'S REPORT as at 31 January 2012
MS Algebris Global Financials UCITS Fund

Major global equity markets fell in the second half of 2011, with the majority of losses posted in Q3. Market attention focussed on the (in)ability of the European policy community to prevent the contagion of peripheral European sovereign debt concerns to the major economies of Spain and Italy. The entanglement of Italy, a country with the third largest stock of public debt globally, into the eurozone crisis marked a turning point in market sentiment. By November, Italian 10 year government bond yields rose to above 7%, undermining the debt dynamics of the eurozone's third largest economy and confidence of the ability of policy makers to erect any kind of meaningful "firewall" for solvent but liquidity-challenged peripheral economies. This back-drop created major funding blocks for European banks, causing a sharp contraction in credit across the world's largest economic bloc. In sum, the environment for risk-assets was poor with the interrelated sovereign and banking crisis in Europe overshadowing what was generally mixed economic data globally. The announcement in early December of the ECB's LTRO programme, triggering a major expansion of the ECB's balance sheet, provided a turning point in the European crisis. The LTRO started a process of restoring confidence that a systemic breakdown would be avoided and precipitated a relief rally into the year end (one which has carried through with substantially more momentum at the start of 2012).

Unsurprisingly, financials performed poorly throughout most of this period. The MSCI World fell 4.04% over the 6 month period ending 31 January 2012 with the MSCI World Financials falling 9.45%. Over the same period, the MS Algebris Global Financials UCITS Fund lost 14.59% as high exposure toward European banks, the epicenter of the crisis, weighed on performance. The major detractors from performance were all long positions, with the SX7E, an index of eurozone banks, Soc Gen and SulAmerica the main culprits. On the positive contributors, an index short on the Indian market used to protect our key long positions was the main contributor, followed by shorts in emerging European banks.

Looking forward we have becoming much more constructive that 5 year period of banks sector underperformance is coming to an end. In Europe, we see the recent three year Long Term Repo Operation conducted by the ECB at the end of December as a key positive. The ECB has done a huge amount to relieve funding pressures in the banking system. The message from the ECB is that banks will not fail due to lack of liquidity. While the ECB is unwilling to assume a role as lender of last resort to the European governments, they are very clearly willing to take aggressive actions to liquefy the banking system. This should translate to a reduction in systemic risk across markets as the likelihood of a European banking system led crises are materially reduced over the next 36 months.

Deutsche Bank	35,000	978,224
Invesco	64,200	870,736

The above represents the largest 20 purchases and sales in the period.

INVESTMENT MANAGER'S REPORT as at 31 January 2012
Emerging Markets Equity Fund

The Sub-Fund's investment objective is to provide Shareholders with a return equivalent to the performance of the MSCI Emerging Markets Index (Total Return Net Dividend Reinvested) denominated in US dollars (the Index) before all fees and expenses.

Over the period the performance of the I USD share is -9.66% when the MSCI index shows a performance -9.56%. Performance since launch 9th Jan 2011 is -8.17% versus -7.98% for the MSCI index.

The downgrade of the United States to AA+ by S&P early August sent all the risk assets performances down. The risk free asset simply ceased to exist. Will the the USA default? will the Euro zone burst? such were the questions of the summer.

In this end of the (financial) World atmosphere the Emerging Markets offered no shield and dropped until early September giving up a maximum of 24% performance from July, twice as much as the S&P 500. October saw the fist rebound attempt but the true recovery started early December and is still ongoing. Cash is still abundant in the Emerging world, USA economics figures are getting better everyday and, to the extent that the short term European worries get smaller, we can anticipate a return of the fundamental based valuation paradigm that should bring back the Emerging countries on the top performers.

INVESTMENT MANAGER'S REPORT as at 31 January 2012
Indus PacifiChoice Asia Fund

For the 6 month period ended January 31, 2012, The Indus PacifiChoice Asia Fund's Class I USD shares generated a negative return of 11.87% (net of fees and expenses). In a period that encompassed the S&P downgrade of US debt from AAA, continued Eurozone turmoil and palpable signs of a slowdown in China, long performance struggled into the end of 2011, while the short book reduced fund volatility and contributed absolute performance. By all accounts the period evidenced a particularly challenging backdrop for investment and, while measures were taken to manage overall risk and position for improved single stock alpha in the future, the Fund was not immune.

Unlike the first half of the fiscal 2011, Fund exposures varied more against the backdrop of a volatile market and generally trended below target during the September-December period in particular. Gross exposures ranged from a monthly high of 180% to a monthly low of 111% and net exposures ranged from a monthly high 48% to a monthly low of 11%. Overall market volatility and the Manager's response to it became the primary driver of Fund returns as opposed to stock-specific alpha which predominated in the first seven months of 2011. Notwithstanding these headwinds, the Manager further concentrated exposure in high conviction ideas such that the top 5 long positions as a percentage of NAV increased from 23% in August to 29% in January. The top 5 short positions in aggregate remained in the 12-13% range of NAV. As a result, going forward a return to single stock alpha generation is more likely as investors' worst fears recede, allowing the material mispricing inherent in the Fund's core positions to normalize.

The top performing single stocks were longs in Japan: On the long side, two top 5 positions stand out: Olympus, the Manager established a position in Olympus in early November after its market capitalisation had declined by over 75% from early 2011. At that point, the market capitalisation had plunged from over US\$8bn at the beginning of 2011 to only US\$1.7bn. Since the company is levered, enterprise value was significantly greater – we estimated it was about US\$7bn at the share price low – but nevertheless low enough to imply a modest valuation. The largest detractors from performance were also longs. SITC International, a shipping and logistics company, was once again a large detractor and this position has been eliminated. Mongolian Mining, a position the Manager has retained, and a several China-related positions rounded out the key losses during the period.

China and Hong Kong started off December 2011 with a strong rally following the government's cut of the reserve-ratio requirement for lenders for the first time since 2008. Many other central banks in the region have already engaged or indicated their intention to ease policy in the near term. Given these policy-easing moves and low valuations across the region, the Manager's outlook became more constructive. This end-of-year period marked a trend change in absolute performance for the Fund. The improvement in regional markets continued in early 2012, led by renewed optimism that the EU and the ECB will be able to stabilize the debt crisis on the continent as well as diminishing fears that China may be heading towards a "hard landing". In addition, there is an ongoing expectation in the market that China will further ease lending restrictions to help spur growth in its economy. The Portfolio Manager maintains a constructive outlook on the region and continues to add exposure to the portfolio.

INVESTMENT MANAGER'S REPORT as at 31 January 2012
MS SOAM U.S. Financial Services UCITS Fund

The investment strategy of the MS SOAM US Financial Services UCITS Fund involves investing primarily in equity securities of companies with market capitalizations greater than \$500 million in the financial services industry, predominantly in U.S. publicly-traded securities of bank holding companies, banks, thrift institutions, insurance companies and other financial services companies, including, but not limited to, asset managers, finance companies, mortgage companies and credit card companies.

Over the last six months, the prices of bank stocks and the fundamentals of the underlying companies have been more disconnected than SOAM has seen them in the past. News from Europe and other macro issues were far bigger drivers of stock prices than fundamentals of the underlying companies. However as 2011 came to a close, the news from Europe became marginally positive and in the US, SOAM became hopeful that potentially positive changes on the political front are close.

The bank indices are down -7.78% for the S&P Bank Composite Index, -18.79% for the BKX Index and -7.54% for the NASDAQ Bank Index since the Fund's inception (April 8th 2011) despite better bank fundamentals such as continued improvement in asset quality, stabilized margins, strong deposit growth and modest loan growth. The MS SOAM US Financial Services UCITS Fund (Class E USD) materially outperformed the indices but was still down -5.85% net of fees.

For the period of July 29, 2011 through January 31, 2012 the fund returned -3.73% (net of fees). In the same period the S&P Bank Composite Index posted a return of +2.29% and the BKX Index and NASDAQ Bank Index were down -7.48% and -1.02%, respectively.

As 2012 begins, SOAM believes bank stock prices are likely to continue to be influenced by global developments and by concerns about regulatory pressure on earnings. However, as effective counter-weights to the global macro concerns there are several forces that could help the bank group to out-perform. These counter-weights include stabilization of real estate prices and declining unemployment, which are both critical to asset quality, and renewed loan growth, which is critical to revenue expansion. Additionally, market valuations for bank stocks remain very low by historical standards, as positive fundamental trends have gotten well ahead of market prices. Moreover; financial stocks are likely materially underweighted in the portfolios of many institutional investors. These last two factors could conspire to significantly lift bank stock valuation multiples.

INVESTMENT MANAGER'S REPORT as at 31 January 2012
MS Ascend UCITS Fund

A summer full of tragi-comedy in Europe and idiocy in Washington culminated in August's four consecutive 400-point swings in the Dow. The August after-hours announcement of the S&P downgrading US debt caused the biggest U.S. market pull back since 2008 with the S&P 500 moving into negative territory down 1.77% YTD and closing the month down 5.43%. Volatility was the major theme in Q3 and Q4 with the S&P declining almost 13% by early October, and ultimately, a hard snapback rally that left the broad indexes essentially flat (S&P 500 up 2.10%) for the full year. Hedge Fund performance, as measured by the HFRI Fund Weighted Composite Index was down over 5%, with the HFRI Equity Hedge (Total) Index down over 8%. This marks the second worst year of hedge fund performance, next to 2008. The geopolitical front included multiple and eventually farcical "this time we really mean it" debt summits in Europe, profound changes in the oil-rich Arab world, exposure of severe flaws in just-in-time manufacturing, and the utter impotence of Washington to address the nation's structural deficit problems. The ability of U.S. equities to hold up in 2011 despite a torrent of negative headlines underscored the reality that the American economy, despite ongoing grumbling about the sluggish pace of the recovery and stubborn unemployment, is in far better shape than those of other major countries. For the period of July 29, 2011 through January 31, 2012, the MS Ascend UCITS Fund's class I EUR returned -6.65% (net of fees and expenses).

Due to extreme market conditions in August, the fund reigned in exposure. We started the month at 185% gross exposure and 13% net long exposure (beta adjusted was closer to 29%). By month end, our gross was down to 103%, net was down to -0.15% (beta of 0.70%). Exposures remained tight through the end of the year as we kept the fund close to market neutral to allow net exposure to be driven by ideas.

The solar sector was wrought with opportunities as it went through a September melt-down. Positive contributions came from sector shorts through year end (positions were covered in early January), with the largest positions in industry darlings with higher cost productions and problematic balance sheets. In October, XRX was a top winner that posted reasonably strong Q3 results, with steady top-line performance, strong equipment sales (partly from pent-up demand after component shortages from Japanese earthquake), and revenue contribution from ramping large service contracts. Longs Smucker's (SMJ) and Wyndham (WYN) did well in November and December for the Consumer Staples and Hotel sectors. For Healthcare, big pharma, led the charge in December as yield hungry investors piled in to the sector (given the big run for this sector in 2011, we have trimmed some positions anticipating better entry points later in Q1 2012). The fund was long both Eastman Chemical (EMN) and Solutia (SOA) in January. On January 27th, EMN announced its intent to acquire SOA, valuing SOA at a ~40% premium to prior closing. The transaction was received very positively by the market, with EMN shares up ~15%. The fund remains long EMN on further earnings revisions upward and improving sentiment around the cyclical ethylene trade.

As we enter 2012, we are focused on increasing our gross exposures across all sectors (back to normal levels) while remaining relatively tight from a net exposure standpoint. Fundamentals in the US are bit better than expected over the past couple of months (e.g. unemployment claims, consumer spending, etc.) and the US has easy GDP comps thru Q1 2012. Interest rates are low, US credit markets are more in equilibrium with equities and equity valuations appear "cheap" by historical standards. The LTRO has had some success on the short end of the funding curve and is a quasi- QE effort. On the negative side, there is still way too much debt in Europe and the US. European data points continue to flash "recession" and austerity plans have the potential to make such slowdowns even more severe through 2012. We wouldn't be surprised to see the market chop around at these levels and we expect the market to be more "balanced" in the near term, with opportunities on both sides of the book.

The above represents the largest 20 purchases and sales in the period.

INVESTMENT MANAGER'S REPORT as at 31 January 2012
MS Cohen & Steers Global Real Estate L/S Fund

The investment objective of the MS Cohen & Steers Global Real Estate Long/Short Fund is to achieve absolute risk adjusted returns, primarily by taking long and synthetic short exposure to real estate companies, including, but not limited to, mortgage originators, regional banks with real estate exposure, homebuilders, manufactured homebuilders, commercial brokerage companies and land developers.

For the period of July 29, 2011 through January 31, 2012 the Fund's class B USD returned -1.72% (net of fees and expenses). In the same period the FTSE EPRA/NAREIT Developed Index Net TRI posted a return of -5.32%.

August saw the reemergence of macroeconomic uncertainty as much of the world's major economies pointed towards a future of muted growth. Intense political battles further rattled investors' confidence as policy makers remained deadlocked over how to resolve the spiraling debt crisis in Europe and the long-term fiscal challenges in the U.S. In this uncertain landscape, our long positions in cyclically sensitive securities weighed on performance. Consequently, we shifted the portfolio towards companies with highly visible cash flows and fortress-like balance sheets in the attempt to protect against the rising fears of economic retrenchment, while maintaining upside exposure.

In the fourth quarter, these fears abated and global real estate securities stabilized. Positive economic news from the United States helped to moderate anxiety. Nevertheless, continued uncertainty from Europe fueled elevated volatility. The generally encouraging news flow helped to drive the momentum which led to a very strong January with the fund returning 4.3% to begin the year.

Moving forward, we favor markets within the Asia Pacific region, including Australia which we believe offers some of the best values globally based on factors such as risk-adjusted yields and valuation. In North America, we see opportunities within the U.S. commercial mortgage market and attractive valuations among certain Canadian real estate operators. We remain generally reticent towards Europe and our long positions are defined by strong balance sheets and high quality property portfolios with long lease terms. Additionally, we see attractive opportunities in certain emerging markets such as Brazil.

INVESTMENT MANAGER'S REPORT as at 31 January 2012
MS Alkeon UCITS Fund

The MS Alkeon UCITS Fund was launched on July 22, 2011. For the period July 29th 2011 to January 31st 2012, the Fund's Class I USD shares declined by 0.29% (net of fees and expenses).

We believe that this is an exceptional time to invest in long-short equity strategies, and importantly, we consider the opportunity set to be equally attractive on the long and short side. One of the key dynamics of last year's equity market was a significant contraction in earnings multiples, with the S&P 500 forward earnings multiple contracting by almost 20% during the year through November 21st (source Morgan Stanley). What that simply implies is that many high-quality companies throughout the year became substantially cheaper and measurably more attractive in our estimation. In a flat or declining market, an investor in such growing businesses gets the increase in value of the underlying franchise due to free cash flow accumulation or its accretive usage, when management decisions are sensible.

In the long run being global is a significant driver of long-term return generation and reflects active participation in fast-growing economies. Global GDP grew at roughly 5% each year from 2004 to 2007, slowed down to approximately 3% in 2008, contracted by just less than 1% in 2009, following the worst recession since the Great Depression, and resumed strongly at 4% growth in 2010. These are growth rates far above those of developed markets. Moreover, and more interestingly from our standpoint, many publicly-traded businesses grew a lot faster over this time period. Our goal remains to find the most attractively valued of such fast-growing businesses going forward.

In short, looking at 2012 and echoing our recent observations, our general views on the market can be summarized as follows. First, there are very few attractive asset classes to invest in globally. Second, for investors with a long-term perspective, equities are on the top of such a short list, representing uncommonly high relative value primarily against the fixed-income bubble and secondarily against other refinancing-fueled asset classes. Third, within the broader equity universe there is a subset of high-quality multinational publicly-traded businesses, which is compelling from an investment standpoint (both in relative and absolute terms) and is decoupling itself from localized economic challenges –thus creating relative safety. Fourth, there exist a large number of businesses which are structurally disadvantaged in today's economy and have vulnerable equity prices. Last, within the global long equity universe Asia ex-Japan is the most attractive region in which to invest, in our estimation.

INVESTMENT MANAGER'S REPORT as at 31 January 2012
MS Perella Weinberg Partners Tokum Long/Short Healthcare UCITS Fund

The MS Perella Weinberg Tokum Healthcare Long/Short Equity UCITS Fund ("Tokum UCITS") is a dedicated Long/Short equity healthcare fund investing globally in all four industry sectors: pharmaceuticals, biotech, medical technologies and services. The team employs a process focused on deep fundamental research to identify company specific opportunities in the context of medium and long term changes in the industry, coupled with a disciplined portfolio construction process to structure and trade this alpha set. The team is led by Emile Westergaard, who has over [17] years of experience in the investment and healthcare sector. Emile is supported by four dedicated analysts. The sub-fund provides shareholders with a return linked to the performance of the PWP Tökum Healthcare Strategy through the use of total return swaps.

In the context of a global environment where dire fiscal budget issues loom over many of the world's most developed nations (and in particular in the US), along with improving efficiency and transparency through the development of new IT, the healthcare sector broadly is going through massive change. With over 40 years of specialized healthcare investment experience, the team is focused on uncovering the company specific opportunities given these major structural shifts. With a focus on long term alpha, the team is focused on uncovering companies that bring efficiency to the system through better systems or technology, high marginal clinical utility, and/or cost efficiency. Alternatively, on the short side of the portfolio, the focus is on the companies in the cross hairs of these issues: over priced products, inefficiency, and low marginal clinical utility. It's important to note, despite pending elections and significant debate around healthcare, these underlying global healthcare trends are a structural and as such predominantly apolitical industry exposure. Our understanding of the implications of these changes provided us with unique opportunities in 2011. We anticipate an accelerating impact from these changes in the next year and believe that our current opportunity set on both the long and short sides of the portfolio are well positioned to take advantage in 2012.

Since its launch on August 17th 2011 through January 31, 2012, MS Perella Weinberg Tokum Healthcare Long/Short Equity UCITS Fund's class S USD returned +13.23% (net of fees and expenses). The Tokum UCITS in 2011 generated positive gross returns in all of its sub-sectors including 5.06% in Healthcare Services, 1.58% in Pharmaceuticals, 2.67% in Medical Technology, and 3.59% in Biotechnology. Since inception in 2007, the Tokum Healthcare strategy has consistently outperformed the healthcare sector, with significant positive cumulative return despite a negative return to the sector over that time.

Heading into 2012, gross long exposure was approximately 93.81% and net long exposure was 47.34%. Gross and net exposure across our four subsectors was reasonably balanced at the end of 2011 and we don't see reason for that to change. The team's excitement for the opportunities afforded them by the themes discussed above is very high. In 2011, the market began to appreciate the magnitude of some of the structural changes we are focused on, and we expect that to continue – and increase – in 2012 and 2013.

INVESTMENT MANAGER'S REPORT as at 31 January 2012
Rivercrest European Equity Alpha Fund

The RiverCrest European Equity Alpha Fund's investment process combines a proven stock picking capability based on cash flow return analysis with a unique portfolio construction and risk management process. This combination neutralises macro and systematic risk factors allowing stock specific risk to drive portfolio returns, at the same time as providing capital preservation.

Since inception, 2nd December 2011 until the 31st January 2012, the Fund has had an average net exposure of 10% and an average gross market exposure of 83%. During this two month period, the long book made +2.01% (gross) and the short book lost -0.76% (gross). Over the period, the Rivercrest European Equity Alpha Fund's class B GBP returned +0.85% (net of fees and expenses).

With the dominance of macro-volatility and short-termism that we witnessed for most of the second half of 2011 fading, the ability for fundamentals to work again has been rising and we have seen dispersions rise, leading to greater opportunities, both long and short, for stock picking funds. If this environment continues we intend to increase the Fund's exposures.

The Fund remains beta neutral, with the managers continuing to identify and select for the long book companies with strong cashflow where equity value is being created, for example, Prudential, BMW and Aggreko. The Fund also remains short companies with weakening cashflow profiles, for example, Carrefour, KPN and Lagardere.

Our investment objective is to continue to preserve capital and have minimal systematic (market risk) exposure given that the backdrop for risk assets remains volatile, and uncertainty in the face of prolonged austerity, fiscal prudence and consumer dissatisfaction over policy measures in place. We are optimistic that we will be able to deliver our target return of 12-15% per annum with annualised volatility of 5-8%.

The above represents the largest 20 purchases and sales in the period.

INVESTMENT MANAGER'S REPORT as at 31 January 2012
MS Claritas Long Short Market Neutral UCITS Fund

The release of positive economic data in both US and China improved significantly the market sentiment and led to a rotation from defensive stocks to higher beta stocks. Under this scenario, January posted foreign capital net inflow of USD 4 Billion in the Bovespa, the highest amount in recent years, very much concentrated on both domestic and international cyclical stocks.

The positive highlights of the month were our pair trade and the small cap strategy while the main detractor was our stock picking long against the Bovespa Index.

Due to the expressive hike of the Bovespa Index, our long position on defensive stocks against the Ibovespa took its toll on the fund's performance. Main losses came from Brasil Foods ON <BRFS3>, Vivo PN <VIVT4>, Cetip ON <CTIP3> and BR Properties ON <BRPR3>. All of those stocks were stronger outperformers last year and suffered from profit taking.

The small caps' book benefited from the improvement in risk appetite in January. Our holdings of Taesa Unit <TRNA11>, JHSF ON <JHSF3> and MMX Royalties <MMXM11> were the main contributors for the fund's performance.

Another positive highlight was our pair trade position of CCR ON against Ecorodovias ON <CCRO3 vs. ECOR3>. Ecorodovias' aggressive bid of a 46% discount to the ceiling tariff for the BR 101 road concession negatively surprised the market penalizing the stock.

The MS CLARITAS Long Short Market Neutral Fund was launched on December 12, 2011. For the nearly 2 month period ended January 31, 2011 the Fund's Class E USD shares generated a positive return of +0.97% (net of fees and expenses).

Investment Objective

MS PSAM Global Event UCITS Fund – the investment objective of the sub-fund is to provide Shareholders with a return linked to the performance of a reference portfolio (the “Reference Portfolio”). The Reference Portfolio is a notional portfolio representative of an actual portfolio of investments which would be made by the Investment Advisor in implementing its global event-driven investment strategy (the “PSAM Investment Strategy”)

The objective of the PSAM Investment Strategy is to seek superior risk adjusted returns associated with exposure to the equity, debt and other securities (including, without limitation, convertible or preferred stock and bonds) of companies which, in the opinion of the Investment Advisor, are mispriced relative to their inherent or embedded value.

The sub-fund will use total return swaps in order to achieve its investment objective.

NOTES TO THE FINANCIAL STATEMENTS (continued)
For the period from 1 August 2011 to 31 January 2012

1. Establishment and Organisation (continued)

Investment Objective (continued)

Salar Convertible Absolute Return Fund - the investment objective of the sub-fund is to generate capital growth, whilst seeking to preserve capital, through exposure to the convertible bond markets. The Sub-Fund is exposed to the economic performance of a reference portfolio (the "Reference Portfolio").

The Reference Portfolio is a notional portfolio representative of a dynamically managed portfolio primarily consisting of convertible bond positions which will be made by the Investment Advisor in implementing its absolute return strategy.

The sub-fund will use total return swaps in order to achieve its investment objective.

Indus Select Asia Pacific Fund – the investment objective of the sub-fund is to seek capital appreciation over the long-term. The Sub-Fund will seek to achieve its objective principally through long term investment in equities and equity related securities including, without limitation, common stock, convertible bonds, warrants, preferred stock and depository receipts, of companies whose registered office or principal place of business is in the Asia Pacific region (including Japan) or that have substantial assets or significant cash flows from the Asia Pacific region.

MS Algebris Global Financials UCITS Fund - the investment objective of the sub-fund is to achieve absolute returns, primarily by taking long and synthetic short positions in equity and debt securities (entering into derivatives in relation thereto) of companies in the global financial services and real estate sectors (including in emerging markets). The Sub-Fund will seek to achieve its objective primarily through investment in listed and unlisted equities and corporate debt securities.

Emerging Markets Equity Fund – the investment objective of the sub-fund is to provide Shareholders with a return equivalent to the performance of the MSCI Emerging Markets Index (Total Return Net Dividend Reinvested) denominated in US dollars (the Index) before all fees and expenses charged to, or incurred by, the Sub-Fund. The Sub-Fund will seek to achieve its objective by investing in equity securities that are constituents of the Index. The Index of this sub-fund is benchmarked against is the MSCI Emerging Markets Index.

The sub-fund will use total return swaps in order to achieve its investment objective.

Indus PacificChoice Asia Fund – the investment objective of the sub-fund is to seek high risk-adjusted returns while preserving capital, principally through investments in liquid equities and equity-related securities of companies in the Asia Pacific markets, including in emerging markets. The Sub-Fund may seek to achieve its objective by principally investing in both long and synthetic short positions in equities and equity related securities including, without limitation, common stock, convertible bonds, warrants, preferred stock and depository receipts.

The sub-fund will use total return swaps in order to achieve its investment objective.

MS Soam U.S. Financial Services UCITS Fund – the investment objective of the sub-fund is to provide Shareholders with a return linked to the performance of a reference portfolio (the "Reference Portfolio"). The Reference Portfolio is a notional portfolio representative of a dynamically managed portfolio of investments primarily consisting of long and short equity positions which will be made by the Investment Advisor in implementing its absolute return strategy (the "SOAM Investment Strategy").

The objective of the SOAM Investment Strategy is to maximise total return.

The sub-fund will use total return swaps in order to achieve its investment objective.

NOTES TO THE FINANCIAL STATEMENTS (continued)
For the period from 1 August 2011 to 31 January 2012

1. Establishment and Organisation (continued)

Investment Objective (continued)

MS Ascend UCITS Fund – the investment objective of the sub-fund is to provide Shareholders with a return linked to the performance of a reference portfolio (the “Reference Portfolio”). The Reference Portfolio is a notional portfolio representative of a dynamically managed portfolio of investments primarily consisting of long and short equity positions which will be made by the Investment Advisor in implementing its strategy to generate superior risk-adjusted returns over a broad range of market environments (the “Ascend Investment Strategy”).

The Ascend investment strategy’s emphasis is primarily on individual equity securities in the U.S. markets.

The sub-fund will use total return swaps in order to achieve its investment objective.

MS Cohen & Steers Global Real Estate L/S Fund – the investment objective of the sub-fund is to provide Shareholders with an absolute return of a reference portfolio (the “Reference Portfolio”). The Reference Portfolio a dynamically managed portfolio of investments primarily consisting of long and short equity positions (including REIT’s).

The objective of the Cohen & Steers Investment Strategy is to seek absolute returns by investing in real estate investment trust (REIT) and non-REIT structures of real estate companies.

The sub-fund will use total return swaps in order to achieve its investment objective.

MS Alkeon UCITS Fund – the investment objective of the sub-fund is to provide Shareholders with a return linked to the performance of a reference portfolio (the “Reference Portfolio”). The Reference Portfolio primarily consists of equity securities of U.S. and non-U.S. companies that the Investment Advisor believes are well positioned to benefit from demand for their products or services and may also be comprised of short positions in such securities.

The objective of the Alkeon Investment Strategy is to achieve maximum capital appreciation by investing primarily in long and short positions of publicly-traded (ie, on Recognised Markets) companies globally, including technology stocks.

The sub-fund will use total return swaps in order to achieve its investment objective.

MS Perella Weinberg Partners Tokum Long/Short Healthcare UCITS Fund – the investment objective of the sub-fund is to provide Shareholders with a return linked to the performance of a reference portfolio (the “Reference Portfolio”). The Reference Portfolio primarily consists of equity securities including new issues and equity related securities of Companies engaged in the various sub-sectors of the healthcare industry and may be comprised of short positions in such securities.

The sub-fund will use total return swaps in order to achieve its investment objective.

Rivercrest European Equity Alpha Fund – the investment objective of the sub-fund is to provide Shareholders with a return linked to the performance of a reference portfolio (the “Reference Portfolio”). The Reference Portfolio primarily consists of equity securities of Pan European Companies that the Investment Advisor believes are well positioned to benefit from demand for their products or services and may also be comprised of short positions in such securities.

The objective of the Rivercrest Investment Strategy is to generate net absolute returns , independent of the market environment, principally by taking long and short positions in equities and equity related securities of Companies in the European markets.

The sub-fund will use total return swaps in order to achieve its investment objective.

NOTES TO THE FINANCIAL STATEMENTS (continued)
For the period from 1 August 2011 to 31 January 2012

1. Establishment and Organisation (continued)

Investment Objective (continued)

MS Claritas Long Short Market Neutral UCITS Fund – the investment objective of the sub-fund is to provide Shareholders with returns which are uncorrelated with Brazilian equity indices, taking advantage of opportunities in the Brazilian equity market. The objective of the Claritas strategy is to invest primarily in equity securities of companies listed or traded on Brazilian recognised markets either directly or through the use of financial derivative instruments.

2. Principal Accounting Policies

The principal accounting policies applied in the preparation of these financial statements are set out below.

Basis of Preparation

The Financial Statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as adopted by the European Union and Irish statute comprising the Companies Act 1963 to 2009 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (the “UCITS Regulations”).

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires the Board of Directors to exercise its judgement in the process of applying the Company’s accounting policies.

Financial assets and liabilities at fair value through profit or loss

(a) Classification

In accordance with IAS 39 “Financial Instruments: Recognition and Measurement”, all investments are classified as financial assets and liabilities at fair value through profit or loss.

This category has two sub-categories: financial assets or financial liabilities held for trading; and those designated at fair value through profit or loss at inception.

(i) Financial assets and liabilities held for trading

Financial assets are classified as held for trading if they are acquired for the purpose of selling and repurchasing in the near term. This category includes equity securities and debt instruments. These assets are acquired principally for the purpose of generating a profit from short term fluctuation in price. All derivatives and liabilities from short sales of financial instruments are classified as held for trading.

(ii) Financial assets and liabilities designated at fair value through profit or loss at inception

Financial assets and financial liabilities designated at fair value through profit or loss at inception are those that are managed and their performance evaluated on a fair value basis in accordance with the Company’s documented investment strategy. The Company’s policy is for the Investment Manager and the Board of Directors to evaluate the information about these financial assets on a fair value basis together with other related financial information. At 31 January 2012, all investment securities and derivatives have been classified as financial assets and liabilities held for trading.

(b) Recognition/derecognition

Purchases and sales of investments are recognised on the trade date – the date on which the Company commits to purchase or sell the investment. Investments are derecognised when the rights to receive cash flows from the investments have expired or the Company has transferred all risks and rewards of ownership.

NOTES TO THE FINANCIAL STATEMENTS (continued)
For the period from 1 August 2011 to 31 January 2012

2. Principal Accounting Policies (continued)

Financial assets and liabilities at fair value through profit or loss (continued)

(c) Fair Value Measurement

Financial assets and financial liabilities at fair value through profit or loss are initially recognised at fair value. Transaction costs are expensed in the Income Statement.

After initial measurement the Company measures financial instruments which are classified as at fair value through profit or loss at fair value. Fair value is the amount for which an asset could be exchanged, or a liability settled, between knowledgeable, willing parties in an arm's length transaction. The fair value of financial instruments is based on their quoted market prices on a recognised exchange or sourced from a reputable broker/counterparty in the case of non-exchange traded instruments, at the balance sheet date without any deduction for estimated future selling costs. Financial assets are priced at their current bid prices, while financial liabilities are priced at their current offer prices.

If a quoted market price is not available on a recognised stock exchange or from broker/counterparty, the fair value of the financial instruments may be estimated by a competent person using valuation techniques, including use of recent arm's length market transactions and reference to the current fair value of another instrument that is substantially the same, discounted cash flow techniques, option pricing models or any other valuation technique that provides a reliable estimate of prices obtained in actual market transactions.

Subsequent changes in the fair value of those financial instruments are recorded in "Net realised and unrealised gains and losses on financial assets and liabilities at fair value through profit or loss". Bank interest income from financial assets at fair value through profit or loss is recognised in the Income Statement on an accruals basis. Dividend income from financial assets at fair value through profit or loss is recognised on an accruals basis in the Income Statement.

All investments in the Company's portfolios as at 31 January 2012 were recorded at fair value.

IFRS 7 requires enhanced classification and disclosures about financial instruments carried at fair value. IFRS 7 establishes a fair value hierarchy for the inputs used in valuation models and techniques used to measure fair value. Fair value represents the price that would be received upon the sale of an asset or paid upon the transfer of a liability in an orderly transaction between market participants at the measurement date (an exit price).

Assets and liabilities measured at fair value are classified into one of the following categories based on the inputs used in measuring fair value:

- Level I – Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities. The type of investments which would generally be included would include equities, liquid corporate bonds and derivatives listed on a securities exchange.
- Level II – Quoted prices in markets that are not considered to be active or financial instruments priced using inputs other than quoted prices and for which all significant inputs are observable, either directly or indirectly (including quoted prices for similar investments in active markets, interest rates and yield curves, credit risks, etc.). The type of investments which would generally be included in this category would include corporate bonds, bank debt and certain over-the-counter derivatives.

Included in Level II are corporate bonds, warrants, contracts for differences, forward exchange contracts, options and total return swaps.

Total Return swaps held by the MS PSAM Global Event UCITS Fund, Salar Convertible Absolute Return Fund, Emerging Markets Equity Fund, MS SOAM U.S. Financial Services UCITS Fund, MS Ascend UCITS Fund, MS Alkeon UCITS Fund, MS Perella Weinberg Partners Tokum Long/Short Healthcare UCITS Fund and Rivercrest European Equity Alpha Fund. Open swap positions are detailed in the schedule of investments. The "Portfolio Total Return Swap" gives the sub-Fund economic exposure to the performance of the Reference Portfolio in exchange for a floating rate of return being paid by the sub-Fund to the approved Counterparty. The sub-Fund purchases Funding Assets and transfers the economic interest in such Funding Assets to the approved Counterparty under a total return swap (the "Funding Swap") in exchange for a floating rate of return being received by the sub-Fund from the approved Counterparty. The schedule of investments details the Funding assets only, of each sub-Fund.

NOTES TO THE FINANCIAL STATEMENTS (continued)
For the period from 1 August 2011 to 31 January 2012

2. Principal Accounting Policies (continued)

Financial assets and liabilities at fair value through profit or loss (continued)

(c) Fair Value Measurement (continued)

• Level III – Prices or valuations that require inputs that are both significant to the fair value measurement and unobservable (including the Investment Manager’s own assumptions and assumptions used by the Board of Directors about what market participants would use in determining the fair value of investments).

There were no investments categorised as level III investments as at 31 January 2012.

The following is a summary of the inputs used to value each sub fund’s assets and liabilities carried at fair value as at 31 January 2012.

	Investments in securities at fair value			
	Level 1	Level 2	Level 3	Total
MS PSAM Global Event UCITS Fund	87,820,725	537,293	-	88,358,018
Salar Convertible Absolute Return Fund	-	67,318,348	-	67,318,348
Indus Select Asia Pacific Fund	19,157,300	864,820	-	20,022,120
MS Algebris Global Financials UCITS Fund	10,792,865	513,613	-	11,306,478
Emerging Markets Equity Fund	242,207,129	(207,336)	-	241,999,793
Indus PacifiChoice Asia Fund	83,672,571	9,818,554	-	93,491,125
MS SOAM U.S. Financial Services UCITS Fund	9,231,492	(81,968)	-	9,149,524
MS Ascend UCITS Fund	131,663,224	(1,004,138)	-	130,659,086
MS Cohen & Steers Global Real Estate L/S Fund	12,176,993	(360,479)	-	11,816,514
MS Alkeon UCITS Fund	29,919,439	195,316	-	30,114,755
MS Perella Weinberg Partners Tokum Long/Short Healthcare UCITS Fund	32,203,730	(131,587)	-	32,072,143
Rivercrest European Equity Alpha Fund	11,022,610	(820)	-	11,021,790
MS Claritas Long Short Market Neutral UCIT Fund	1,399,230	12,283	-	1,411,513

(d) Derecognition

A financial asset is derecognised where

- the rights to receive cash flows from the asset have expired or
- the Company has transferred its rights to receive cash flows from the assets or has assumed an obligation to pay the received cash flows in full without material delay to a third party under a “pass-through” arrangement and
- either (a) the Company has transferred substantially all the risks and rewards of the asset, or (b) the Company has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

When the Company has transferred its rights to receive cash flows from an asset (or has entered into a pass-through arrangement), and has neither transferred nor substantially all the risks and rewards of the asset nor transferred control of the asset, the asset is recognised to the extent of the Company’s continuing involvement in the asset.

The Company derecognises a financial liability when the obligation under the liability is discharged, cancelled or expires.

NOTES TO THE FINANCIAL STATEMENTS (continued)
For the period from 1 August 2011 to 31 January 2012

2. Principal Accounting Policies (continued)

Offsetting Financial Instruments

Financial assets and financial liabilities are offset and the net amount reported in the balance sheet if, and only if, there is a currently enforceable legal right to offset the recognised amounts and there is an intention to settle on a net basis, or to realise the asset and settle the liability simultaneously. This is generally not the case with master-netting arrangements, and the related assets and liabilities are presented gross in the balance sheet.

Foreign exchange translation

(a) Functional and presentation currency

The functional currency of the MS Algebris Global Financial UCITS Fund and the MS PSAM Global Events Fund is the Euro ("€") as the majority of the Fund's share dealing transactions are carried out in € and the € is linked directly to a number of currencies in which both Funds invest. The functional currency of the Emerging Markets Equity Fund, Indus PacificChoice Asia Fund, Indus Select Asia Pacific Fund, Salar Convertible Absolute Return Fund, MS SOAM U.S. Financial Services UCITS Fund, MS Ascend UCITS Fund, MS Cohen & Steers Global Real Estate L/S Fund, MS Alkeon UCITS Fund, MS Perella Weinberg Partners Tokum Long/Short Healthcare UCITS Fund and MS Claritas Long Short Market Neutral UCITS Fund is the US Dollar ("US\$") as the majority of its investments are denominated in US\$ and a corresponding proportion of the Fund's share dealing transactions are carried out in US\$. The functional currency of the Rivercrest European Equity Alpha Fund is the British Pound ("£") as the majority of the Fund's share dealing transactions are carried out in £ and the £ is linked directly to a number of currencies in which the Fund invests. The presentation currency of the Company is US\$.

(b) Transactions and balances

Foreign currency transactions are translated into the functional and presentation currency using the exchange rates prevailing at the dates of the transactions. Assets and liabilities are translated into the functional currency using exchange rates in effect at the balance sheet date. Foreign exchange gains and losses resulting from the settlement of transactions and from the translation at period-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the Income Statement.

Translation differences on financial instruments held at fair value through profit or loss are reported as part of net gain/(loss) on financial assets and liabilities at fair value through profit or loss in the Income Statement.

For the purposes of producing the combined financial statements, period end exchange rates are used for the Consolidated Balance Sheet and average exchange rates (as an approximation of actual rates) are used for the Income Statement and the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shareholders. The currency gain on retranslation of opening net assets is included in the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shareholders. The method of translation has no effect on the value of the net assets of each Fund.

Net assets attributable to holders of redeemable participating shares

International Accounting Standard 32 "Financial Instruments: Presentation" ("IAS 32") requires entities that issue financial instruments to classify such instruments as liabilities or equity in accordance with the substance of the contractual arrangement and the definitions contained within IAS 32. In this regard, IAS 32 requires that financial instruments that give the holder the right to put the instrument back to the issuer for cash or another financial asset be classified as a liability of the issuer.

The redeemable participating shares issued by the Company provide the redeemable participating shareholders with the right to redeem their shares for cash equal to their proportionate share of the net asset value of the Company. Within the context of IAS 32, the existence of the option for the redeemable participating shareholders to put the shares back to the Company in exchange for cash requires the Company to classify the redeemable participating shares as liabilities.

NOTES TO THE FINANCIAL STATEMENTS (continued)
For the period from 1 August 2011 to 31 January 2012

2. Principal Accounting Policies (continued)

Net assets attributable to holders of redeemable participating shares (continued)

The liability to redeemable participating shareholders is presented on the Balance Sheet as “net assets attributable to holders of redeemable participating shares” and is determined based on the residual assets of the Company after deducting the Company’s other liabilities and management share capital.

Cash and cash equivalents

Cash and cash equivalents in the balance sheet comprise cash on hand, demand deposits, short term deposits in banks which are subject to an insignificant risk of changes in value, with original maturities of three months or less.

The custodian to the Company is Northern Trust Fiduciary Services (Ireland) Limited and has appointed Northern Trust (Guernsey) Limited (“NTGL”) as its global custodian. Substantially all of the cash assets of the sub-funds are held with NTGL and Morgan Stanley & Co International plc (MSI), Sub-Custodian to certain sub-funds.

The Sub-funds of the Company can have debit balances to hedge foreign currency risk and this is shown as Bank Overdraft on the Balance Sheet. It’s the sub-funds policy not to remain in a net overdraft facility at any given time.

Income from investments

Bank interest income and expense are recognised in the Income Statement on an accruals basis. Bond interest income and expense are recognised in the Income Statement using the effective interest rate method.

Dividend income is credited to the Income Statement on the dates on which the relevant securities are listed as “ex dividend”. Dividend income is shown gross of any withholding taxes, which is disclosed separately in the Income Statement, and net of any tax credits.

Net gain or loss on financial assets and liabilities at fair value through profit or loss

This item includes changes in the fair value of financial assets and liabilities held for trading or designated upon initial recognition as “at fair value through profit or loss” and excludes interest and dividend income and expenses.

Unrealised gains and losses comprise changes in fair value of financial instruments for the period and from reversal of prior period’s unrealised gains and losses for financial instruments which were realised in the reporting period.

Realised gains and losses on disposals of financial instruments classified “as at fair value through profit or loss” are calculated using the First-in, First-out (FIFO) method. They represent the difference between an instruments initial carrying amount and disposal amount, or cash payments or receipts made on derivative contracts (excluding payments or receipts on collateral margin accounts for such instruments).

Operating Expenses

The Company is responsible for all normal operating expenses including audit fees, stamp and other duties and charges incurred on the acquisition and realisation of investments. Operating expenses are recognised on an accruals basis.

NOTES TO THE FINANCIAL STATEMENTS (continued)

For the period from 1 August 2011 to 31 January 2012

3. Cash and cash equivalents

The custodian to the Company is Northern Trust Fiduciary Services (Ireland) Limited and has appointed Northern Trust (Guernsey) Limited (“NTGL”) as its global custodian. Substantially all of the cash assets of the sub-funds are held with NTGL and Morgan Stanley & Co International plc (MSI), Sub-Custodian to certain sub-funds.

Cash deposited with NTGL is deposited as banker and is held on its Balance Sheet. Accordingly, in accordance with usual banking practice, NTGL’s liability to the Fund in respect of such cash deposits shall be that of debtor and the Fund will rank as a general creditor of NTGL. NTGL is an indirect wholly owned subsidiary of the Northern Trust Corporation (TNTC).

Cash held with Morgan Stanley & Co International plc is held under a client money protection agreement. MSI is an indirect wholly owned subsidiary of Morgan Stanley. In addition the cash may include payables for securities purchased (in a regular way transaction) that have been contracted for but not yet delivered on the reporting date and margin accounts and receivables for securities sold (in a regular way transaction) that have been contracted for but not yet delivered on the reporting date. Margin accounts represent cash deposits held with Morgan Stanley International plc as collateral against open futures contracts.

TNTC is a publicly traded and constituent of the S&P 500 and has a credit rating of AA- from Standard & Poors. MSI has a credit rating of A from Standard & Poors and A2 from Moody’s.

As at the 31 January 2012 the cash amounts net of bank overdraft balances held with Northern Trust (Guernsey) Limited and Morgan Stanley International plc were as follows:

4. Fees and Other Expenses

Management Fee

The Company will pay to the Investment Advisor from the assets attributable to each class of Shares of the Sub-Fund the following fees which are based on a percentage of net assets attributable to such class of Shares, which is accrued daily and paid monthly in arrears at an annual rate set out in the below table.

Performance Fee

The Investment Advisor will also be entitled to receive a performance fee (the "Performance Fee") from the Company calculated on a Class basis or a Share-by-Share basis for funds operating equalisation. The Performance Fee will be payable by the Company to the Investment Advisor in arrears within 14 calendar days of the end of each Calculation Period at a rate set out in the below table.

The performance fee in respect of each class of shares is calculated using the relevant performance fee rate detailed in the below table applied to the net appreciation in the net asset value of each class. The net appreciation reflects the movement from the high watermark to the net asset value per class at the final valuation date in a calculation period. The initial high watermark is the net asset value per share at which the relevant share class was launched.

For each subsequent performance period, the high watermark is the net asset value per share at the last performance period where a performance fee was paid or the net asset value per share at which the relevant share class was launched where no such performance fee has been paid since the launch of the relevant share class.

For more information on the performance fee of each of the Sub Funds please refer to the prospectus.

Risk Management, Administrator's and Custodian's Fees

The Company will pay the Promoter, out of the assets of the Sub-Funds, a fee, which will not exceed 0.35% per annum of the net assets of the MS PSAM Global Event UCITS Fund, 0.30% per annum of the net assets of the Salar Convertible Absolute Return Fund and 0.40% per annum of the net assets of the Indus Select Asia Pacific Fund, Indus PacifiChoice Asia Fund, MS Algebris Financial UCITS Fund, MS SOAM U.S. Financial Services UCITS Fund, MS Ascend UCITS Fund, MS Cohen & Steers Global Real Estate L/S Fund, MS Alkeon UCITS Fund, MS Perella Weinberg Partners Tokum Long/Short Healthcare UCITS Fund, Rivercrest European Equity Alpha Fund and MS Claritas Long Short Market Neutral UCITS Fund and will be accrued daily and paid monthly in arrears. No Promoter fee will be paid in respect of the Emerging Markets Equity Fund.

NOTES TO THE FINANCIAL STATEMENTS (continued)
For the period from 1 August 2011 to 31 January 2012

4. Fees and Other Expenses (continued)

Risk Management, Administrator's and Custodian's Fees (continued)

The Promoter will, inter alia, pay the fees and expenses of the Administrator and Custodian in addition to director and audit fees in full out of this fee and will be entitled to retain any excess after payment of such fees for risk management services provider by the Promoter. Notwithstanding the above, any transaction charges, reasonable fees and customary agents' charges due to any sub-custodian (which shall be charged at normal commercial rates) together with value added tax, if any, thereon, shall be paid out of the assets of the Sub-Fund or, if paid by the Custodian, shall be reimbursed to the Custodian out of the assets of the Sub-Fund.

The administration fee and custodian fee in respect of the Emerging Markets Equity Fund will be paid by FundLogic SAS.

Ongoing Charges and Expenses

The additional charges and expenses specified in the section entitled Ongoing Charges and Expenses in the Prospectus will, save in respect of the fees of the Distributor, be paid out of the assets of the Sub-Fund.

Kevin Molony and Wyndham Williams received a director fee of €15,000 from the Company for the period from 1 August 2011 to 31 January 2012.

5. Related Party Disclosures

IAS 24 'Related Party Transactions' requires the disclosure of information relating to material transactions with parties who are deemed to be related to the reporting entity. Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

FundLogic SAS, the Investment Advisor, is deemed a related party virtue of the fact that they earn Investment Advisor fees from the Company as detailed in Note 4. The Investment Advisor has appointed Sub-Investment Advisors to manage the portfolios of all sub-funds except for the Emerging Markets Equity Fund. For amounts paid to the Investment Advisor during the period and amounts payable at the period end refer to the Income Statement and the Balance Sheet. The sub investment advisor fees are payable by the Investment Advisor.

The cost of establishing the Company and the expenses of the initial offer of shares in the initial Sub-Funds, the preparation and printing of the prospectus, marketing costs and the fees of all professionals relating to it will be borne by Morgan Stanley & Co International plc, the ultimate parent company to FundLogic SAS.

In addition Morgan Stanley & Co International plc is the counterparty to the Company for all open derivative contracts as disclosed in the schedule of investments at 31 January 2012.

Morgan Stanley & Co International plc has been appointed by to Company to act as Promoter, Risk Manager and Distributor of the Sub-Funds. During the period, promoter fee expense amounted to \$669,380 and the payable at period end amounted to \$77,024. These fees are net of expenses of the administrator, custodian, director fees and audit fees.

Morgan Stanley & Co International plc or any of its employees, agents, affiliates, subsidiaries may perform further or alternative roles relating to the Company and any Sub-Fund, including for example

- (i) being the counterparty in respect of any investments of the Company,
- (ii) being involved in arrangements relating to the relevant investments (for example as a derivative counterparty, or a calculation agent),
- (iii) being appointed as sub-custodian by the Custodian and the Company
- (iv) acting as a market maker in respect of Shares, and/or
- (v) being responsible for providing valuations which may form the basis of calculating the Net Asset Value per Share in respect of any Sub-Fund and
- (vi) sponsor otherwise be involved with a variety of structured products such as participating notes, options or swaps linked in whole or in part to the performance of one or more Sub-Funds.

Morgan Stanley & Co International plc and its affiliates may receive compensation for providing such services to the Company at normal commercial rates.

NOTES TO THE FINANCIAL STATEMENTS (continued)

For the period from 1 August 2011 to 31 January 2012

6. Share Capital

The authorised share capital of the Fund is 300,002 subscriber shares (subscriber shares) of €1 each and 1,000,000,000,000 shares of no par value initially designated as unclassified shares and available for issue as Shares. The minimum issued share capital of the Company is €2 or its equivalent in any other currency. The maximum issued share capital is €1,000,000,000,000 or its equivalent in any other currency.

The movement in the number of redeemable participating shares during the period was as follows:

NOTES TO THE FINANCIAL STATEMENTS (continued)
For the period from 1 August 2011 to 31 January 2012

7. Soft Commission Arrangements

There were no soft commission arrangements affecting the Company during the period ended 31 January 2012.

8. Taxation

Under current Irish law and practice the Company qualifies as an investment undertaking under Section 739B of the Taxes Consolidation Act, 1997 and is not therefore chargeable to Irish tax on its relevant income or relevant gains. No stamp, transfer or registration tax is payable in Ireland on the issue, redemption or transfer of Shares in the Company. Distributions and interest on securities issued in countries other than Ireland may be subject to taxes including withholding taxes imposed by such countries.

The Company may not be able to benefit from a reduction in the rate of withholding tax by virtue of the double taxation agreement in operation between Ireland and other countries. The Company may not, therefore, be able to reclaim withholding tax suffered by it in particular countries.

Following legislative changes in the Finance Act 2006, the holding of shares at the end of a relevant period will, in respect of Irish resident investors, also constitute a chargeable event. To the extent that any tax issues arise on such a chargeable event, such tax will be allowed as a credit against any tax payable on the subsequent encashment, redemption, cancellation or transfer of the relevant shares.

Relevant period is defined as a period of eight years beginning with the acquisition of a share by a shareholder and each subsequent period of eight years beginning immediately after the preceding relevant period.

Dividends, interest and capital gains (if any) on securities in which the Company invests may be subject to taxes including withholding taxes imposed by such countries. In addition, where the Company invests in securities that are not subject to withholding tax at the time of acquisition, there can be no assurance that tax may not be withheld in the future as a result of any change in applicable laws, treaties, rules or regulations or the interpretation thereof.

The Company is not required to deduct dividend withholding tax on dividend payments to shareholders provided the shareholder has completed the relevant declaration. It is the intention of the Directors that the business of the Company will be conducted in such a manner to ensure that the Company will be regarded as resident in Ireland for tax purposes.

9. Efficient Portfolio Management

The Company may, on behalf of each sub-fund, employ (subject to the conditions and within the limits laid down by the Financial Regulator) techniques and instruments relating to transferable securities and money market instruments, provided that such techniques and instruments are used for efficient portfolio management purposes. Such techniques and instruments may also, on behalf of each sub-fund, include foreign exchange transactions which alter the currency characteristics of transferable securities held by the Company. The Company may also, on behalf of each sub-fund, employ (subject to the conditions and within the limits laid down by the Financial Regulator) techniques and instruments intended to provide protection against exchange risks in the context of the management of its assets and liabilities.

Realised gains and losses on financial instruments used for efficient portfolio management are included in the Income Statement.

NOTES TO THE FINANCIAL STATEMENTS (continued)
For the period from 1 August 2011 to 31 January 2012

11. Net Asset Value Per Share

The Net Asset Value per share at the period end date is determined by dividing the value of the Net Assets of the Company by the number of participating shares in issue. The Net Asset Value per Share is calculated using valuation principles which differ slightly from those used in preparing these financial statements. These differences relate to accounting treatments required with respect to the use of bid prices (IAS 39) for financial statement purposes. No differences arose between the dealing NAV per share and the NAV per share as disclosed in the financial statements except for the NAV per Share of the Emerging Markets Equity Fund Class A USD which has been adjusted in the financial statements to reflect the use of bid prices in the valuation of investments as required by IAS 39. The reconciliation of the dealing NAV per share to the NAV per share of the Emerging Markets Equity Fund Class A USD as disclosed in the financial statements is detailed below. Refer to note 9 for details of dealing NAV per share in respect of each share class. None of the other funds NAV per share have been amended to reflect the bid-ask adjustment as the difference is not material.

Emerging Markets Equity Fund	31 January 2012	31 July 2011
	Class A USD	Class A USD
NAV per Share per Valuation	918.31	1,016.53
Adjustment for bid prices re: IAS 39	(18.92)	(5.66)
	899.40	1,010.87
NAV per Share per financial statements		

12. Subsequent Events

Subsequent to the period end, the Company launched the following new Sub-Funds:

Sub-Fund	Central Bank Approval date
Amadeus Libor Fund	31 January 2012

Subsequent to the period end, Eric Halet, one of the two founding partners of Algebris, has announced his intention to take a sabbatical, and to step back from the investment business that he and co-founder Davide Serra started back in 2006. Eric Halet has relinquished his portfolio management responsibilities and Davide Serra will continue to drive the business at Algebris.

There were no other significant events subsequent to 31 January 2012 to the date the financial statements were approved by the Directors.

13. Date of Approval

The financial statements were approved by the Board of Directors on 21 March 2012.
